FOUNDERS' MESSAGE

“

As a company, we continue to invest in research and development because we believe there is still significant potential for technology to improve the way people learn the Qur'an, understand Salah, memorize duas and introduce Islamic knowledge to children.

When we established Qari Technologies in 2004, our objective was to use technology as a meaningful means of supporting Qur'anic learning and Islamic education. We believed that thoughtfully designed electronic products could make Qur'anic recitation, Islamic knowledge, prayer guidance and daily duas more accessible to individuals and families.

Our journey began with MP3 Qur'an USB players. From there, each generation of products helped us strengthen our understanding of users, markets, content integration, software, firmware, product design and manufacturing. Today, we are able to support our partners from the earliest stages of an idea through to product design, sample development, software and firmware creation, content integration, manufacturing, packaging and delivery.

We are especially proud of the trust placed in us by publishers, distributors, importers and brand owners. Our OEM, ODM and private-label services have enabled our partners to introduce products designed specifically for their languages, audiences and commercial objectives.

We also understand that Islamic products carry a special responsibility. Qur'anic text, recitation and Islamic content must be approached with accuracy, respect and care. For this reason, Qur'anic text and audio are reviewed internally and through third-party

verification before production. Other Islamic content is reviewed by qualified scholars, publishers or content specialists. Audio recordings are assessed for pronunciation and content quality, while customized content is shared with clients for approval before production.

Our goal is to create useful learning tools that have lasting educational and spiritual value.

We are grateful to our team, customers, publishers, distributors and business partners who have contributed to our journey. Their trust and feedback have helped us develop more than 100 products, complete over 100 OEM and private-label projects, and reach markets across more than 20 countries.

As we move forward, we remain committed to innovation, authentic content, responsible product development, dependable manufacturing and long-term partnerships.

We will continue working to bring Islamic learning to life through technology.

ABOUT US

قاري
TECHNOLOGIES

*Bringing Islamic
Learning to Life
Through Technology*

Qari Technologies is a registered Islamic technology brand committed to making Qur'anic learning, Islamic education and faith-based knowledge more accessible through thoughtfully developed electronic products.

Since its establishment in 2004, the company has focused on combining authentic Islamic content with practical technology. What began with MP3 Qur'an USB devices has gradually evolved into a broad portfolio of interactive learning tools, audio products, prayer-guidance solutions, children's educational devices and customized multimedia products.

Today, Qari Technologies develops and supplies products across several categories, including Pen Qur'an devices, Qur'an speakers, Adhan clocks, Salah Learning Mat, Islamic lamps, LCD-based Qur'an devices, children's learning products, and customized Islamic audio and multimedia devices.

At the heart of the company is a complete product-development model. Product conceptualization, content planning, product design, software development and firmware development are managed in Pakistan. Tooling, molding, manufacturing, assembly, testing and packaging are carried out through the company's facility in China.

This structure allows Qari Technologies to maintain control over the complete development process while remaining flexible enough to support a wide variety of customer requirements.

The company works with publishers, distributors, importers, wholesalers and brand owners who require either ready-made products or fully customized solutions. Depending on the project, Qari Technologies can provide an existing product under the client's brand, modify an existing model for a specific market, or develop a new product from concept to execution.

Customization can include product shape, mold, color, branding, packaging, content, language, translation, reciter, firmware, software functions, product features, accessories and market-specific configurations. Audio recording, content graphics and customized Islamic educational material can also be developed where required.

Qari Technologies places particular importance on the accuracy of Islamic content. Qur'anic text, audio, and other content are thoroughly checked internally and through third-party verification before production. Pronunciation, recording quality and content clarity are also checked before final integration.

Through continuous research, technical development and collaboration with international partners, Qari Technologies has developed more than 100 products and completed more than 100 OEM and private-label projects. Its products are now supplied across more than 20 countries, including India, Pakistan, Bangladesh, Malaysia, Indonesia, GCC countries and across North Africa. Products also reach Europe and the US through OEM/ODM partners.

By combining Islamic-content responsibility, technical expertise, customization and scalable manufacturing, Qari Technologies provides partners with a reliable platform for developing meaningful Islamic learning products for modern audiences.

OUR VISION

To become a globally trusted leader in Islamic technology by creating innovative and accessible products that enrich Qur'anic learning, strengthen Islamic education and support faith-based living for individuals, families and communities worldwide.

Our vision is to help shape a future where Islamic knowledge can be experienced through reliable, meaningful and easy-to-use technology. We aim to develop products that remain respectful of authentic Islamic content while responding to the changing learning habits and technological expectations of modern users.

Through continuous innovation, international partnerships and responsible product development, Qari Technologies seeks to serve diverse markets, languages, age groups and learning needs.

OUR MISSION

Our mission is to combine authentic Islamic content, thoughtful product design, software and firmware expertise, flexible customization and dependable manufacturing to create meaningful electronic learning solutions.

We work to make Qur'anic recitation, translations, duas, prayer guidance and Islamic education easier to access, understand and experience.

We support publishers, distributors, importers, wholesalers and brand owners by providing complete Qari-branded, OEM, ODM and private-label solutions. From product conceptualization and content planning to sample development, manufacturing, quality assurance and delivery support, we aim to provide every partner with a reliable and professionally managed development process.

Our mission is also to continuously improve existing products, explore new learning methods and use technology responsibly to enhance the connection between users and Islamic knowledge.

OUR BRAND PROMISE

Authentic Islamic learning, brought to life through trusted technology.

Every Qari Technologies product is developed around four central commitments: meaningful purpose, verified content, reliable functionality and responsible execution.

Whether a product is introduced under the Qari Technologies brand or developed for an OEM, ODM or private-label partner, we approach it with the same level of care and professional responsibility.

Our partners can expect honest communication, flexible customization, dependable technical support and a commitment to developing products that are suitable for their users and markets.

Our users can expect products designed to make Islamic learning more accessible, practical and engaging.

Authenticity

We take careful measures to verify Qur'anic text, audio recitation, translations, duas and educational content before production. Internal review, third-party verification and consultation with qualified scholars, publishers or content specialists help us maintain the integrity of the material included in our products.

Innovation with Purpose

Our research and development efforts are focused on improving the way people learn the Qur'an, and understand Islamic teachings. We develop features and products that provide practical educational value and improve the user's learning experience.

Quality and Reliability

From component sourcing and sample development to assembly, content loading, functional testing and packaging, every stage is carefully managed. Products are reviewed for performance, sound quality, content accuracy, labeling and usability before shipment.

Responsibility

We approach every project with respect, professional accountability and attention to detail. This responsibility extends beyond content to product safety, supplier selection, communication, quality control and after-sales support.

VALUES

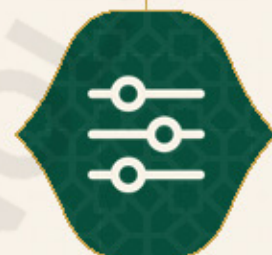

Partnership

Our teams work closely with publishers, distributors, importers and brand owners to understand their objectives, markets and audiences. We involve partners throughout the project, particularly during specifications, content review and packaging development.

Flexibility and Customization

Languages, translations, learning preferences, product features and packaging requirements can vary significantly from one region to another. Our flexible development model allows us to adapt products to specific commercial and educational needs.

Continuous Improvement

We regularly review product performance, customer feedback and emerging technologies to improve products and identify new opportunities. Our dedicated R&D team continuously works on new concepts and enhancements that can improve learning experiences.

Long-Term Support

We provide technical troubleshooting, repair assistance, spare-parts support, firmware and content updates, product guidance and distributor training. This commitment helps improve product performance, partner confidence and long-term customer satisfaction.

2004

The Beginning

Qari Technologies was established with a vision to use electronic technology as a practical medium for Qur'anic learning and Islamic education. The company began with MP3 Qur'an USB players designed to make recitation more accessible and convenient.

2011

Expanding into OEM and Private Label

As its product and manufacturing expertise grew, Qari Technologies began providing OEM and private-label solutions to publishers, distributors and brand owners. During this period, Qur'an speakers became an important part of the company's expanding portfolio.

2007

Strengthening Product Development

The company expanded its technical capabilities and introduced Qur'an USB devices with LCD displays. These products marked an important step toward combining audio content with clearer navigation and an improved user experience.

OUR JOURNEY

2014

A Broader Islamic Technology Portfolio

The introduction of Pen Qur'an devices, Azaan clocks and additional Islamic learning products strengthened the company's position in the international Islamic electronics market. Qari Technologies continued to expand its content, language and customization capabilities.

2021

New Learning Experiences and International Growth

The development of the Digital Sajadah represented a new direction in interactive prayer education. At the same time, the company increased its international market presence and strengthened its regional and manufacturing operations.

TODAY

An Integrated Global Operation

Qari Technologies now operates with a global team of more than 50 professionals and has developed over 100 products. With a manufacturing facility in China, product and technology development in Pakistan, a regional office in Indonesia and logistics support through the UAE, the company serves its clients across more than 20 countries.

Its annual production capacity has reached up to one million devices, supported by experience in branded products, OEM, ODM, private-label manufacturing and fully customized Islamic technology solutions.

PRODUCT PORTFOLIO

Pen Qur'an Devices

The Pen Qur'an is one of the core products of Qari Technologies and represents the company's strong foundation in interactive Islamic learning devices. Designed to make Qur'anic recitation and learning more accessible, the Pen Qur'an allows users to listen to selected verses, surahs, translations, duas, and other Islamic content through a simple touch-and-listen system.

Qur'an Speakers

Qari Technologies manufactures a wide range of Qur'an speakers designed for homes, offices, shops, travel, gifting, and personal use. These remote-controlled products make Qur'anic recitation, translations, duas, adhkar, and audio content easily accessible through compact and user-friendly devices. Qur'an speakers are among the most versatile products in the company's portfolio.

PRODUCT PORTFOLIO

Salah Learning Mat

The Salah Learning Mat is an interactive prayer-learning solution designed to guide users through the steps of Salah. Through audio guidance and structured content, it can help children, new learners and families understand prayer movements, recitations and selected adhkar. The product demonstrates Qari Technologies' ability to combine physical learning tools with audio-based educational technology.

Adhan Clocks

Qari Technologies offers Adhan clocks that help users maintain their daily prayer routine through accurate prayer reminders, Adhan alerts, time display, date settings, and user-friendly functions. Adhan clocks can be customized for different markets with city settings, languages, display styles, sound options, recitations, packaging designs, and brand identity.

PRODUCT PORTFOLIO

Islamic Lamps and Lifestyle Products

The company develops Islamic lifestyle products that combine decorative lighting with Qur'anic audio and related functions. These include the Kaaba Model Levitation Speaker, Moon Lamp Qur'an Speaker and LED Lamp Qur'an Speaker. The Kaaba Model Levitation Speaker combines a magnetically levitating and rotating Kaaba model with LED illumination, remote control, and an integrated Qur'an speaker featuring recitations. Other products include remote control, Qur'anic recitation, translations, duas and speaker functions.

Digital Qur'an Multimedia Devices

A pioneering all-in-one Islamic multimedia device developed to make Qur'anic learning, listening and daily worship resources conveniently accessible through a dedicated digital platform. These products combine complete Qur'an recitation, translations in many languages, Tafsir, Hadith, duas, prayer times, Qibla direction and other essential Islamic content within a portable colour-display device.

PRODUCT PORTFOLIO

Islamic Children's Learning Products

Qari Technologies develops interactive products that introduce children to Islamic learning through sound, play and educational activities. The portfolio includes Islamic baby mobile toys with duas, products such as My ABC Car. My ABC Car combines mathematics exercises, letter recognition, spelling, words, English and Arabic learning, and Islamic duas within a child-friendly toy format.

Welcome Dua Device

Welcome Dua is a compact electronic device designed to be installed near a door frame. When the door is opened or closed, the device plays selected Islamic duas or reminders. This simple concept integrates faith-based audio into everyday routines and can be customized with different content and language options.

RESEARCH AND DEVELOPMENT

Research and development is central to the growth and long-term direction of Qari Technologies. The company has invested in a dedicated R&D function responsible for developing new product ideas, improving existing devices, exploring emerging technologies and identifying more effective ways to support Qur'anic learning and Islamic education.

Our R&D approach combines technical research, content planning, market understanding and user-experience improvement.

New Product Development

Each idea is reviewed according to its educational value, technical feasibility, market relevance, production requirements and potential user experience.

Audio and Content Development

The team evaluates how recitations, translations, duas, instructions and visual material can be structured within a product for convenient access and effective learning.

User-Centred Development

Products may be designed for children, elderly users, new learners, families, travellers or users who prefer simple audio navigation.

Software and Firmware Research

This includes content-navigation systems, audio-file management, display interfaces, memory structures, language selection, interactive testing, remote-control functions and customized product behaviour.

Improvement of Existing Products

Existing models are regularly reviewed to identify opportunities for improvement in functionality, navigation, audio quality, screen performance, software, firmware, battery performance, product design, accessories and packaging.

The company operates through a manufacturing facility spread over 10,000 sq. ft. in China, and has the capacity to produce up to one million devices per year. Since 2004, the company has developed over 100 products and has completed more than 100 OEM and private-label projects.

All components are sourced from established suppliers and are selected according to the product's technical requirements and industry standards.

The company's global team of more than 50 professionals supports product development, software, firmware, content preparation, manufacturing, quality assurance, sales, customer coordination and after-sales service.

Molding & Product Preparation:

Product housings and structural parts are prepared according to the approved specifications.

Assembly:

Product housings, components such as speakers, displays, batteries, etc. are assembled.

Firmware Installation:

Approved software and firmware are installed.

Functional Testing:

Each product undergoes functional checks before packaging. The correct content structure and file mapping are checked to ensure the product functions as intended.

Products involving Qur'anic text, audio or interactive books receive additional checks according to their content structure.

Visual & Appearance Inspection:

Product surfaces, printing, logos, labels, screens, buttons, colors and overall quality are inspected.

Packaging:

Products are packed according to the specification. The process includes placement of devices, accessories, manuals, books, and protective materials. Branding, labels, and other elements are checked before shipment.

Warehousing:

The facility provides warehousing support for packaging materials, components, work-in-progress items and completed products.

Quality Inspection:

Quality assurance covers functionality, content operation, sound quality, appearance, accessories, packaging and labeling.

Qari Technologies provides comprehensive OEM, ODM and private-label services for clients. Whether a client requires a ready-made product with private labeling or a fully customized product developed from concept to production, Qari Technologies provides professional support at every stage of the process.

Qari Technologies also offers a fully functional sample before mass production. This allows clients to assess the product, software, content, and packaging before the final production.

Our OEM, ODM and private-label relationships are supported beyond initial delivery. Our after-sales support include firmware updates, content updates, spare-parts support, repair guidance, and technical troubleshooting.

Qari Technologies has developed more than 100 customized products for its clients across international markets. Here are selected customized products:

A photograph of a baby crib mobile with a crescent moon and stars, and a box labeled 'Alla'.

Islamic Baby Crib Mobile

The Islamic Baby Crib Mobile was developed as a customized product that combined the standard functions of a conventional crib mobile with carefully selected Islamic audio content.

Qari Technologies adapted the product concept to include remote-controlled operation and multiple duas while retaining the standard functions expected from the category, such as rotating hanging elements, soothing audio, etc.

Pen Qur'an & Qur'an Speaker

Qari Technologies developed a customized Pen Qur'an solution, adapting the product around the publisher's content, brand identity and intended users. The company integrated the content, product configuration, firmware, printed-book compatibility, packaging, and accessories into one complete solution.

The company also produced customized Qur'an speakers, integrating the client's branding and approved content into a complete audio product.

Customization Options & Solutions We Offer

Product Conceptualization

Product purpose, intended users, learning objective, required functions, content requirements, price positioning, etc.

Audio Content Production

Professionally record, edit, and prepare customized audio content in preferred languages, voices, and formats.

Design & Appearance

Product shape, size, color, finishing, button layout, display style, and overall visual identity.

Molds & Structure

Custom product molds, new shapes, unique designs, and structural adjustments.

Branding

Logo placement, brand colors, product labels, manuals, inserts, and packaging identity.

Languages & Translations

Market-specific language options, printed materials, manuals, and packaging text.

Firmware & User Experience

Firmware customization, menu structure, mapping, product behavior, etc.

Audio & Islamic Content

Qur'anic reciters, translations, duas, adhkar, ruqyah, Islamic stories, content for kids, etc.

Features & Functions

Button functions, playback modes, remote-control functions, memory capacity, etc.

Packaging

Retail boxes, premium gift boxes, cartons, inner packing, export packaging, etc.

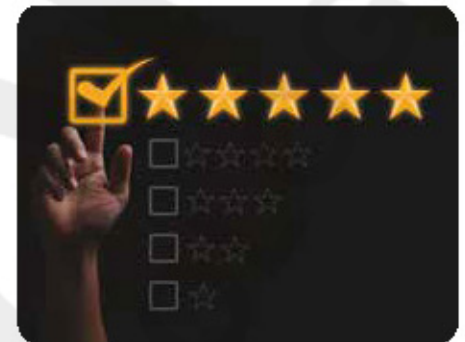

Accessories

Chargers, cables, remotes, stands, booklets, inserts, etc.

Quality Assurance and Control at Qari Technologies covers the complete product-development and manufacturing process. As a specialized manufacturer of Islamic technology products, we understand that quality is not limited to product appearance or functionality alone. It also includes reliability, sound performance, content accuracy, user experience, packaging presentation, and long-term customer satisfaction.

Every product manufactured by Qari Technologies is developed with attention to practical usability, market requirements, and client expectations. Whether it is a Pen Qur'an, Qur'an speaker, Adhan clock, Lifestyle product, educational toy, or customized OEM/ODM product, each item goes through a structured checking process before shipment.

The company's products comply with applicable manufacturing standards. In addition, Qari Technologies periodically carries out third-party testing to ensure that its products continue to meet high standards of safety, performance, and reliability. For clients who require additional verification, third-party inspection can also be arranged before shipment.

✿ Responsible Component Sourcing

Qari Technologies sources components such as batteries, PCBs, displays, speakers, charging parts and other electronic items from reputed and established suppliers.

Certified Components:

All components, including batteries and other electronic parts used in Qari Technologies products, are supported by the necessary certificates and technical documentation applicable to their respective categories.

Technical Compatibility:

Components are reviewed for voltage, capacity, dimensions, performance, compatibility and integration with the product's PCB, housing, software and firmware.

Sample Evaluation:

Components are tested during sample development before they are approved for mass production.

Battery Sourcing:

Batteries are sourced from reputed suppliers with the appropriate supporting documentation for their product category. Battery selection considers capacity, voltage, size, charging requirements and compatibility with the finished product.

Our Quality Control & Assurance Process

Incoming Component Review

Components received from suppliers are checked according to product requirements before use.

Pre-shipment Inspection

Before products are released for delivery, a final inspection is carried out.

In-process Quality Control

Checks are carried out during assembly to identify issues at an early stage.

Third-Party Testing & Inspection

Third-party product testing or shipment inspection can be arranged if required by the client.

Functional Testing

Depending on the product, testing may cover:

- Power & charging performance
- Battery operation
- Button and control response
- Audio playback
- Speaker and Display quality
- Remote-control operation
- Memory access
- Content navigation
- Accessory compatibility
- Content Testing

Content Accuracy & Verification

We follow a careful review and verification process before content is approved for production. We review and check the following:

- Qur'anic Text
- Qur'anic Audio
- Translation
- Islamic Content
- Pronunciation
- Audio-Quality
- Digital and Printed Content Matching

Software and Firmware Checks

The correct software and firmware version is verified. Products are tested to ensure that components and software function as intended.

Verification Certificates

A content-verification certificate can be produced when required, subject to the project scope and verification arrangement.

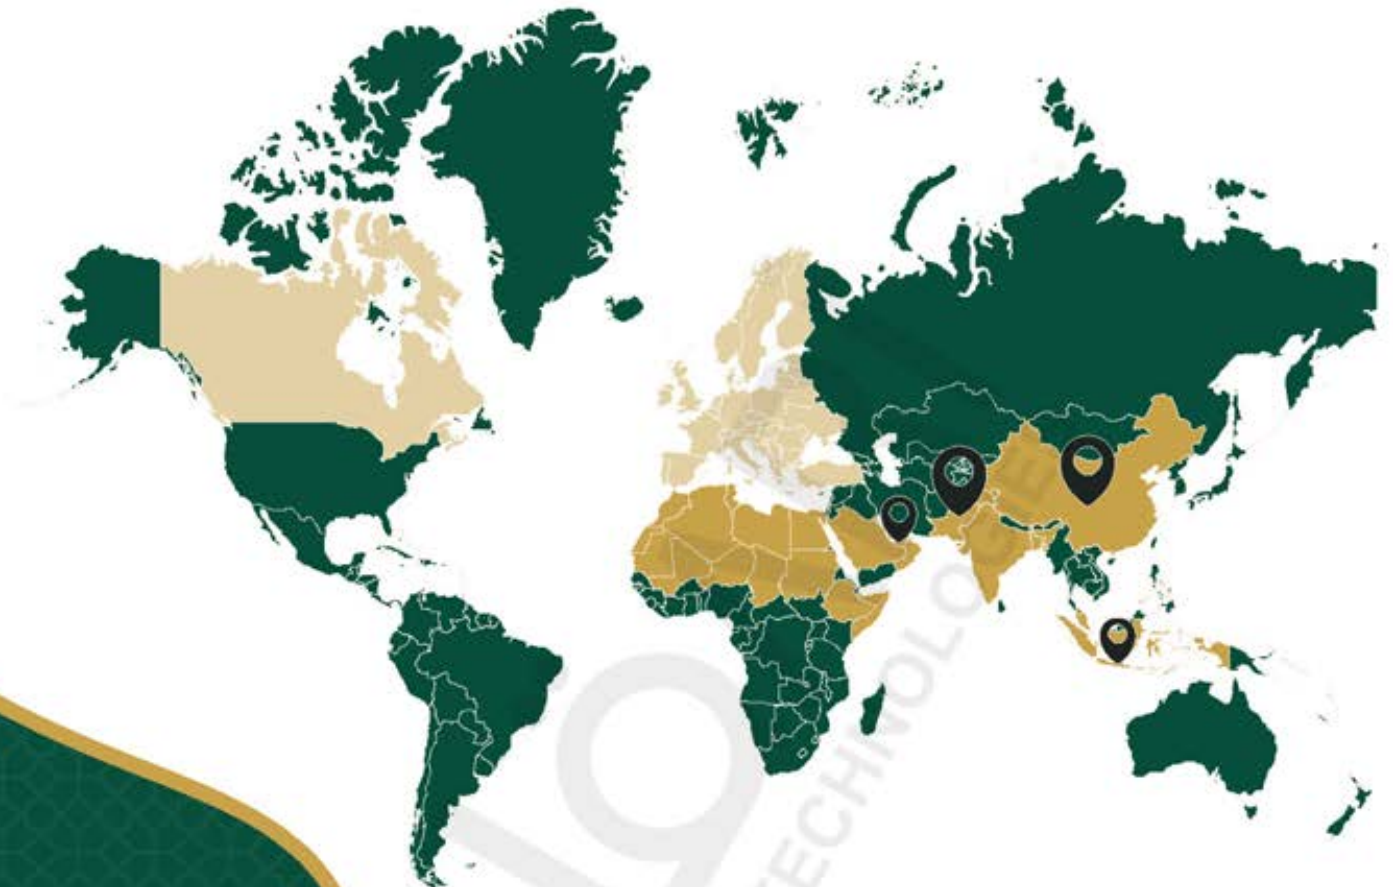

Audio and Content Testing

Loaded audio and content are checked for correct playback.

Version Control

Approved content is maintained in controlled versions.

GLOBAL PRESENCE

CORPORATE
OFFICE:
Pakistan

MANUFACTURE:
China

BRANCH:
Indonesia

INT'L LOGISTICS SUPPORT:
United Arab Emirates

EXPORT REACH:
20+ Countries

Qari Technologies operates through an international structure that connects product development, technology, manufacturing, regional market support and logistics.

Pakistan serves as the corporate, strategic and technical base of Qari Technologies. The Qari Technologies trademark is operated by **Kunn Solutions**, Pakistan. The Pakistan operation manages product conceptualization, product design, software & firmware development.

China is the centre of the company's physical manufacturing operations.

PT Qari Technologies Indonesia serves as the company's Indonesian branch & regional office.

Qari Technologies currently exports to over 20 countries, serving clients across the Middle East, Southeast Asia, Africa, and other markets.

Qari Technologies supports its partners beyond product development and manufacturing by providing practical logistics and delivery coordination for international orders. Through established logistics partners based in the UAE, the company assists its clients with the movement of products from the manufacturing facility to their intended markets.

✿ UAE Logistics Support

The UAE serves as an important logistics hub within the company's international operating structure.

Through experienced partners based in the UAE, Qari Technologies supports export coordination, regional shipment handling and access to established logistics networks serving the Middle East, Africa and wider international markets.

This arrangement is particularly useful for clients who prefer to route shipments through a recognized global trading and logistics centre.

✿ Local Printing Support

Certain Islamic learning products, particularly Pen Qur'an systems and other devices supplied with books or printed educational materials, can involve significant shipping volume.

To help reduce freight cost and improve flexibility, Qari Technologies offers to provide editable printing files so that approved books, manuals or supporting materials can be printed within the client's local market. This approach reduces shipping weight, improves replenishment flexibility and allows the client to manage language-specific printed material more efficiently.

✿ Post-Delivery Coordination

Following delivery, Qari Technologies remains available to support the client with product clarification, technical guidance, spare-parts coordination, firmware or content-related matters and after-sales requirements.

CUSTOMER CARE & AFTER-SALES SERVICE

Qari Technologies considers after-sales service an important part of the complete product solution. The company supports its clients after delivery to help them maintain product performance, respond to customer inquiries and manage technical issues within their markets.

Repair Support

Qari Technologies provides technical guidance to distributors' service teams for product diagnosis, troubleshooting, and repair.

Warranty and Claims Support

The company supports its clients in reviewing warranty claims, identifying product faults, and coordinating the appropriate repair, or replacement.

Spare-Parts Support

The company supplies and coordinates spare parts to support timely repairs and continued product performance.

Firmware Updates

Firmware updates are developed and supplied to correct technical issues, improve functionality, and enhance product performance.

Customer/Distributor Support

Qari Technologies assists distributors with product-use inquiries, setup guidance, troubleshooting, and technical questions raised by customers.

Service Training

Product manuals, repair instructions, troubleshooting guidance, & technical training are provided to help service teams support products efficiently.

Content Updates

Audio, language, translation, and other digital content are updated, or reloaded to keep compatible products relevant.

Technical Issue Resolution

Reported issues are documented, evaluated, and escalated to the relevant technical team to ensure effective resolution.

Long-Term Product Support

Qari Technologies builds long-term partnerships through ongoing technical guidance, repair assistance, spare-parts supply, firmware and content updates, and cooperation on future product development.

CLIENTS & PARTNERS

Over the years, Qari Technologies has built long-term business relationships with publishers, distributors, retailers, wholesalers, importers, and private-label brand owners across international Islamic product markets.

Qari Technologies has supplied products to respected Islamic publishers and business partners. This experience reflects the company's capability to support serious market players with products that require content sensitivity, product reliability, attractive presentation, and consistent supply.

OUR CLIENT SEGMENTS:

Islamic Publishers

E-Commerce Sellers

Retailers and Islamic Stores

Private-Label Brand Owners

Qur'an and Islamic Book Distributors

Islamic Product Wholesalers

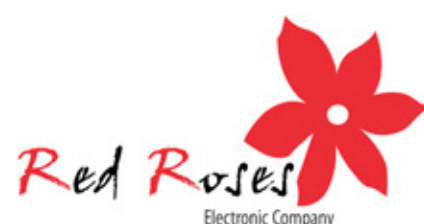

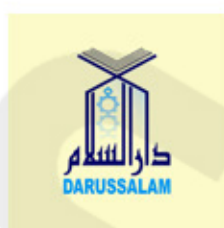

Educational Suppliers and Institutions

Retailers and Islamic Stores

Selected Clients:

WHY

20+ Years of Specialized Experience

The long-standing experience helps the company understand not only manufacturing requirements, but also the expectations of Muslim families, publishers, distributors, retailers, and private-label brands across different markets.

Trusted by Publishers & International Partners

Qari Technologies has supplied products to publishers, distributors, retailers, and Islamic product businesses across multiple regions, including respected names,

A Complete Islamic Technology Partner

Qari Technologies offers the experience, capability, and commitment required to bring meaningful products to market with confidence.

Complete OEM/ODM Capability

From ready-made private-label products to fully customized solutions involving molds, shapes, features, firmware, content, packaging, and branding, the company provides end-to-end product-development support.

Scalable Production Capacity

With an annual production capacity of up to one million devices, the company can support both specialized customized orders and larger international supply programs.

QARI?

Export Experience Across 20+ Countries

The company's experience across the Middle East, Southeast Asia, Africa, and South Asia helps it support different market requirements, product preferences, packaging styles, language needs, and commercial expectations.

Fully Functional Sample Development

Clients can review and test a fully functional sample before mass production. This provides an opportunity to evaluate the design, functions, software, content, audio, branding and overall user experience.

Reliable After-Sales Support

The company supports buyers with professional communication, product guidance, spare parts coordination, technical assistance, and after-sales support.

Quality-Focused Process

The company's products comply with applicable local China-based standards, and periodic third-party testing is carried out to support quality, safety, and reliability.

Innovation and Product Development

From Moon Lamp Qur'an speakers and Islamic baby mobile toys to customized Pen Qur'an solutions, the company focuses on creating Islamic products that are useful, attractive, and relevant for today's customers.

Product Evolution

A Legacy of Innovation in Islamic Technology

For more than two decades, Qari Technologies has been at the forefront of creating meaningful solutions that bring the Qur'an and Islamic learning closer to Muslims around the world.
